Price Reduced! - 187 Main St., Rio Vista

Retail and/or Office Space

The building was probably constructed in 1901(?) and has served many occupants over the years, including a saloon, a barbershop, a real estate agency, and a bookstore. An outdoor mural (and plaque) on its 2nd street wall depicts some of this history.

The building is rectangular at 100' (?) x 20' (?). Lot is rectangular and is ~40' (?) on Main Street and extending 100' (?) south on 2nd Street. Property includes a parking lot for six cars.

Construction: Wood, lathe, and plaster, with stucco exterior. It is single story. The back 20' (?) of the building was an add-on, but the date of the addition is not known.

Roof: Resurfaced in January, 2015, with foam and epoxy coating. Prior to that, there had been a leak near the southwest corner of the building.

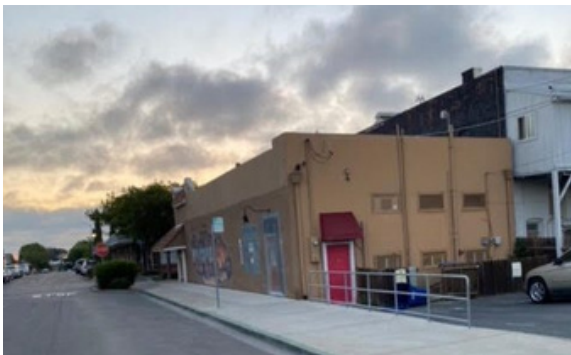

Basement: None. Building constructed on a wood frame sitting on the ground, as was the custom when it was built.

The HVAC system is in the attic and was refurbished in 2019. It works adequately now; but it is an old system, and there is no way to tell when it might need replacement. We have mounted two carbon-monoxide detectors in the building just in case a leak in the heating system were to develop.

In 2019, a leak developed in the incoming water line somewhere between the front of the building (The meter is on the Main Street sidewalk) and the rear of the building where the only usage of the water is (Kitchen sink and bathroom). Since we could not locate where the leak was, in May, 2019, we installed a new water line extending from the front of the building, up into the attic area, straight back to the rear of the building, and down inside the outside wall to feed the kitchen sink and the bathroom.

Alarm system: Currently with ADT, with entry/exit at rear door, sensors on front door and rear door, and two inside motion detectors.
